CONSENT FOR BLOOD / BLOOD COMPONENT TRANSFUSION

Your Physician has recommended blood / blood product transfusion as an effective form of therapy for you. Along with the blood you will be receiving a small amount of anticoagulant also.

Transfusion is safe but there are inherent risks of adverse effects.

The adverse effects could be urticaria, itching, fever with chill, sweating, flushing, Increased pulse, chest pain, back pain, pain at infusion site, nausea, petechiae, dark or red urine, jaundice, decreased urine, headache, low blood pressure, breathlessness, cough, vomiting/abdominal cramps, cyanosis or shock and even death of a patient.

The CLIA test is negative during the incubation period of the viral diseases like HIV, Hepatitis B and Hepatitis C. This test cannot detect low levels of viral antigen of antibodies.

I aged Blood Group

Bag. No. I.P. No. have read and understood the possible

consequence of blood transfusion, I understand that the physician has recommended this therapy with the belief that it is absolutely essential for treatment. I here by authorise the transfusion of blood / blood components.
